## PERSONAL DATA

Birthday: 22/09/1987  
Nationality: Bulgarian, Spanish resident  
Ability to work: Full time  
Employment status: Currently employed  
Driving licence: Car/Van  
Own Vehicle: Car, Motorbike

## OBJECTIVE

I have 10 years experience as a front-end developer, creating responsive websites using HTML, CSS, and JavaScript.

In my past experience I have obtained an eye for detail and appreciation for design and typography. I specialize in front-end development and WordPress integration but my knowledge and experience of multiple fields allows me to work on a project with the full scope in mind.

The work I provide is of highest quality, tested in a wide range of devices and fully responsive. I take great care to ensure my projects are well-documented and easily maintainable so you can enhance a website as your company grows.

In my opinion front-end development of a website is overlooked, a project combining both design & back-end development at the end narrows down to the layer that your users interact with, from my experience it is the most important to get it right.

I create responsive websites that allow the user to experience your website in the best and most appropriate way suited to the device they are using. Writing semantic markup that is documented and easy to read can be maintained and scaled in the future, and also helps my colleagues to quickly work with it.

My fields of expertise are web & app design, branding, search engine optimization, mobile design for iOS & Android, cms wordpress & ecommerce magento development and integration, concepts & wireframes, graphic design, print & layout, web hosting and router networking.

My front-end build process involves the use of tools such as Sass , Gulp, Markdown, and NPM to speed up development.

I can quickly and efficiently join your team using continuous-integration with methods and tools such as Git, Podio, Trello, and test/behaviour driven development.

Have experience working on a freelance projects, together with developers with NodeJS, React, Phonegap, Ruby on Rails.

## **ZapTV Media**

**February 2015 — Present**

Front-End Developer

- Develop and design of TV Guide portals and taking care for their online presence
- Search engine optimization and functional testing

## COVER LETTER

I enjoy being challenged and working on projects that require me to work outside my comfort and knowledge set, as continuing to learn new languages and development techniques are important to me and the success of your organization.
